

# PARTS MODULE

Don't let manual parts orders or confusing software hassle you

Auto/Mate's Parts module simplifies and streamlines your orders

## Product Description

Auto/Mate's Parts Module easily manages your parts department's daily functions and inventory. We provide simple access to reports tracking your profitability and measuring important inventory metrics.

## How Parts can help your dealership:

- Streamlined workflow and cross-department communications
- No manual parts orders
- Easy functionality

## Fully integrated across all departments

Streamline your workflow and communications with parts scanning services and accounting products. This allows your counterperson to easily look up parts pricing, provides a glance at your fastest and slowest moving parts and sends parts order receipts over to accounting.

## Easily order the parts you need from your OEM

Accurately submit orders and returns between the DMS and the OEM. Auto/Mate's OEM integrations make placing your parts orders a breeze by eliminating manual orders, providing you ease and peace of mind.
